

MailRoom ToolKit® Architect

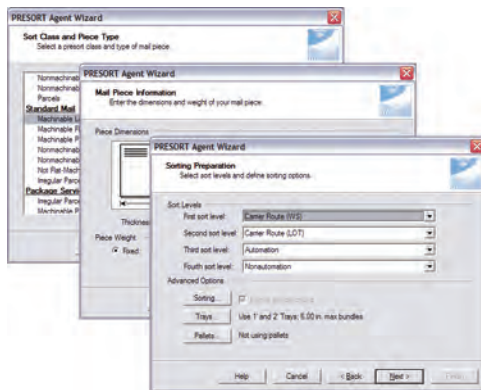

Address correction and postal presorting for your database, website or application

MailRoom ToolKit Architect offers a complete set of address management tools you can use to develop the solution that meets your unique needs. Architect is CASS Certified™ for address correction and PAVE™ certified for postal presorting. It works with nearly any application that collects, stores or uses address data.

Uses for MailRoom ToolKit Architect

- Validate addresses at point-of-entry on your website
- Clean and update addresses in any database – protect your investment in lead-generation and customer retention programs
- Integrate postal presorting into your custom application – eliminate import/export hassles
- Build address management tools into your product – deliver more value to your customers
- Reduce errors and save data entry time with rapid addressing
- Document processing benefits from integrated postal presorting and address verification

Flexible and Easy-to-Implement

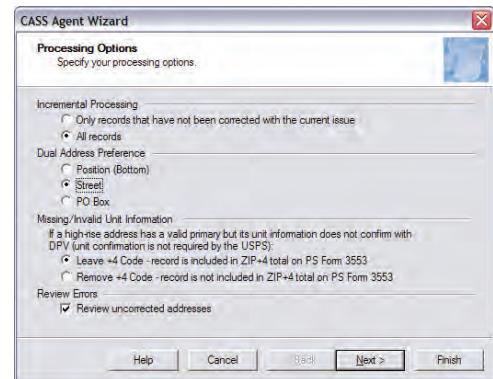

Built to make integration and maintenance easy, MailRoom ToolKit Architect features the latest and best technologies, including client/server architecture and automatic updating for clients.

Surprisingly little code needs to be written in order to use the full features of Architect.

- C/C++ (32-bit); .NET / C#
- Microsoft Office & SQL
- Oracle, Siebel & Other COM-compatible applications
- SalesLogix
- Visual Basic (32-bit)
- Visual FoxPro 4.0 or later
- Websites

MailRoom ToolKit Architect Features

- **Client/Server design** – Scalable and compatible with a variety of platforms and environments
- **CASS Certified for Address Correction** – Integrate address validation and correction into your system with advanced functionality: unattended processing, distributed processing in multi-server environments and multi-threading
- **PAVE Certified Postal Presorting** – Integrate postal presorting into automated and scheduled processes to streamline volume mail preparation from address correction through printing presorted, barcoded mail
- **Real-time Move Update Service** – Use the built-in 48-month NCOALink® service to update your database with the new addresses of people and businesses that have moved, without any import/export hassles
- **Website Development** – Architect technology plugs directly into ASP and ASP.NET pages, or use TCP/IP to communicate with other platforms

Includes our powerful MailRoom Server

The scalable MailRoom Server can meet the needs of any size organization. MailRoom Server gives you accelerated server-side processing, multi-processor and load-balancing support, multi-thread ability, server and performance monitoring tools and more.
