STREAMLINE YOUR MAIL FINISHING OPERATIONS

Mail is a vital tool for communicating with your customers, whether it is in the form of invoicing, marketing, product shipment, or other important communications. Yet, for many businesses, mail is the last frontier for business process improvements. Advancements in technology make this a great time to streamline your mail center.

The DP825™ and DP875™ Digital Mailing Systems are easy to use, reliable, and deliver high levels of productivity configured to meet your specific needs. These business solutions bring cost controls, process improvements and accounting functions right to your mail center. Designed for busy mailers, these mailing systems can help you automate your mail center and make it run as efficiently as other parts of your business.

USE TECHNOLOGY TO BENEFIT YOUR BOTTOM LINE

IntelliLink® Technology provides a single source access to your postage account, the Postal Service and other carriers. The IntelliLink® Control Center automates all the system's functions, including USPS® and carrier rate updates, access to USPS® Special Services and instant operating system updates. With rate shopping flexibility you can realize savings between carriers.

Easy to Use

Easy to follow prompts on the IntelliLink® Control Center helps guide the operator through the steps needed to process the mail. Up to 25 routine jobs can be preprogrammed for faster processing. The automated postage refill ensures you never run out of postage. You can also mark incoming mail with the date and time or track your outgoing mail through your on-line account.

USPS® Compliant

The DP825™ and DP875™ are fully compliant with the USPS® requirements for secure postage printing, delivery and tracking information via the web, Information Based Indicia (IBI), and the latest technology for the Postal Security Device (PSD).

Automatic Software Updates

With IntelliLink® technology you get critical 24/7 management of postage payments in addition to automatic new feature downloads.

Process USPS® Special Services

Electronic Delivery Confirmation™, Signature Confirmation™, Certified Mail™ and Electronic Return Receipt can be processed through the IntelliLink® Control Center.

The control center offers ease of use and access to services.

DETAILS - DP825™ / DP875™ DIGITAL MAILING SYSTEM

1. Interfaced Weighing Platforms

You can choose your weighing options to best fit your mailing application. Optional 15 lb. Integrated Weighing Platform shown. Add differential weighing to process mixed weight mail pieces in the same batch right on the scale. The system will calculate the postage based on the difference in weight as packages are removed.

2. Mixed Mail Feeding

Handles mail ranging from postcards to 13" x 13" flats up to 5/8" in thickness eliminating manual sorting of varying types of mail.

3. Fast Processing

Automatic feed up to 230 letters per minute.

4. Weigh-on-the-Way®

In line weighing in conjunction with Shape Based Rating eliminates sorting by weight and size. Each piece is weighed and measured and proper postage calculated and imprinted at speeds up to 115 letters per minute.

5. IntelliLink® Control Center

A centralized point of operations offers ease of use and access to services. All rate selections are made through the control center and are easily updated.

6. Auto Tape Mode

Processing heavier mail that requires a tape can be repetitive and time consuming. This feature sets the system to automatically generate a tape when material is placed on the scale.

7. Optional Power Stacker

Drop stacker with 5" stacking capacity comes standard. Optional power stacker is available which neatly stacks mail and keeps it in original order for optimum productivity.

8. Sturdy Work Table

This work table provides sufficient working space to manage your mailing activity. A full range of furniture options are available.

Add messages to your mail with a choice of downloadable envelope ads.
