<b>DUTY CYCLE</b>	60 million addresses total or 1,000,000 per month over a 5-year life cycle						

OPTIONAL FEEDER SHOWN

You need to produce inexpensive non-enveloped mass mailings and brochures that look great and meet postal discount requirements with a tight secured seal on every piece.

The versatile RENA Systems T-750 In-Line Tabber/Stamp Affixer produces high speed, high production and high quality tabbing or stamp affixing at a very affordable cost. Kick it up a notch in quality with precision feeding and accurate tab application all at production speeds, up to 20,000 pieces per hour. The T-750 will automatically apply translucent or paper wafer seals to a wide variety of open-ended media including mail pieces, folded stock, double postcards, newsletters, booklets, etc., up to 3/8" thick. The tabbing is accurate to within 1/16 of an inch. RENA

Systems technology gives you the control to adjust speed and placement, and choose from a variety of programming options. You can apply one, two or three tabs in a single pass.

The Tabbing system is designed to run in-line with various feeding/printing devices. It offers synchronized speed control with the EASYFeed Lite and Start/Stop Control with other RENA Systems feeders. An emergency stop button and interlocks on all adjustments give you state-of-the-art safety.

The T-750 is easy-to-set up, easy-to-run and is built with heavy-duty aluminum and steel construction to give you years of reliable, high performance use.

## KEY FEATURES

- **Production speeds up to 20,000 pieces/hr., double tab at 12,000 pieces/hr., triple tab at 8,000 pieces/hr.**
- **Use paper, translucent or clear tabs on rolls up to 14" in diameter (up to 30,000 tabs)**
- **Applies tabs, small labels or USPS stamps one, two or three at a time**
- **Automatic tab detection and positioning**
